VILLAGE HOUSE FOR RENOVATION

This is a unique opportunity to acquire a typical village house in need of renovation.

Built before 1951 and situated right in the centre of the village, this property features a main dwelling with four divisions, as well as a kitchen with high ceilings that includes a storage area above which extends laterally through to the next room, large enough to stand up in and easy to create a mezzanine space that would become an interesting internal feature. There is an outdoor laundry area, and a very pretty inner courtyard. This outside area is private and full of character... you could possibly create small swimming pool pr water feature to enjoy those hot and sunny days.
